Step 8: after clicking create a new device / add device you can choose an device type and device id and complete the following information to create a device

Step 9: created a device of nodemcu

The screenshot displays the IBM Watson IoT Platform web interface. The browser's address bar shows the URL: `https://slcfz.internetofthings.ibmcloud.com/dashboard/devices/drilldown/NodeMCU:12345?returnTo=/devices/browse`. The page title is "Device Drilldown - 12345". On the left, a sidebar menu lists various options: "Device Credentials" (selected), "Connection Information", "Recent Events", "State", "Device Information", "Metadata", "Diagnostics", "Connection Logs", and "Device Actions". The main content area, titled "Device Credentials", contains a message: "You registered your device to the organization. Add these credentials to the device to connect it to the platform. After the device is connected, you can navigate to view connection and event details." Below this message is a table with the following details:

Organization ID	slcfz
Device Type	NodeMCU
Device ID	12345
Authentication Method	use-token-auth
Authentication Token	NaveenPM

Below the table, a warning icon and text state: "Authentication tokens are non-recoverable. If you misplace this token, you will need to re-register the device to generate a new authentication token." A link "Find out how to add these credentials to your device" is provided at the bottom. The bottom of the screen shows a Windows taskbar with various application icons and a system tray indicating the date as 06-11-2022 and time as 10:51.
